Customer Problem Statement Template

Create a problem statement to understand your customer's point of view. A well-articulated customer problem statement allows the team to find the ideal solution for the challenges customers face.

Problem Statement 1 (PS-1): The Patient

Template Fields:

- **I am:** A patient seeking professional medical consultation.
 - **I'm trying to:** Find verified medical specialists, book appointments easily, and share my medical files securely.
 - **But:** I encounter unverified profiles, scheduling clashes (double-bookings), and lack a secure digital channel to upload my medical history.
 - **Because:** Existing online platforms do not vet practitioner credentials, rely on manual schedule checks, and store uploads insecurely without access controls.
 - **Which makes me feel:** Anxious about my healthcare quality and concerned about the privacy of my medical records.
-

Problem Statement 2 (PS-2): The Doctor (Practitioner)

Template Fields:

- **I am:** A busy medical practitioner trying to manage my daily appointments.
- **I'm trying to:** View patient records prior to consultation, coordinate my slots, and write digital prescriptions.
- **But:** I receive messy schedules, cannot access my patient's digital locker easily, and have to rely on handwritten prescriptions.
- **Because:** There is no integrated electronic prescription tool or role-controlled repository of patient-uploaded logs.
- **Which makes me feel:** Overwhelmed by administrative overhead and restricted in my diagnostic efficiency.
