

Ideation Phase - Empathy Map Canvas

Parameter	Detail
Date	18 June 2026
Team ID	Book-a-Doctor Platform
Project Name	Book a Doctor
Maximum Marks	4 Marks

Empathy Map Canvas: Patient User Persona

1. What does the Patient THINK & FEEL?

- *Thoughts:* "Is this doctor actually verified?", "Are my uploaded medical PDFs secure?", "Will the system double-book me?"
- *Feelings:* Anxious when searching for a specialist; relieved when receiving a prescription.

2. What does the Patient HEAR?

- *Social context:* Peers complaining about long clinic queues, data leaks in modern health platforms, and fake doctor profiles.

3. What does the Patient SEE?

- *UI Context:* Search pages with filter options (fee range, specialty, location), a clean dashboard listing their bookings, and a "Digital Locker" button.

4. What does the Patient SAY & DO?

- *Says:* "I want to consult an experienced cardiologist under \$150."
- *Does:* Filters listings, books a slot, uploads a PDF of past reports, and downloads the digital prescription.

5. PAIN Points

- Fear of appointment cancellation, scheduling conflicts, and data leakages.

6. GAIN Points

- Immediate slot feedback, secure file sharing, and clean digital prescriptions readable from any device.
-

Empathy Map Canvas: Doctor User Persona

1. What does the Doctor THINK & FEEL?

- *Thoughts*: "I need an organized calendar", "I want to review the patient's medical history before they step in."
- *Feelings*: Administrative fatigue, a desire for simplified digital tool workflows.

2. What does the Doctor HEAR?

- *Clinic Context*: Patients asking for digital receipt copies, clinic managers complaining about schedule coordination.

3. What does the Doctor SEE?

- *UI Context*: A dedicated Doctor Dashboard showing "Manage Appointments", patient reports lists, and a "Prescribe" modal interface.

4. What does the Doctor SAY & DO?

- *Says*: "Please upload your recent blood reports to the portal."
- *Does*: Logs in, checks upcoming queue, approves pending slots, reviews files, and types prescriptions.

5. PAIN Points

- Double bookings, lack of access to structured patient histories.

6. GAIN Points

- One-click approval logic, paperless records, and automated database updates.
