

Project Development - User Acceptance Testing (UAT)

Parameter	Detail
Date	18 June 2026
Team ID	Book-a-Doctor Platform
Maximum Marks	4 Marks

Project Overview

- **Project Name:** Book a Doctor - Healthcare Booking & Auditing Platform
- **Project Version:** v1.0.0
- **Testing Period:** 10 June 2026 to 20 June 2026
- **Testing Environment URL:** Local development server (`http://localhost:3000` & `http://localhost:5000/api`)
- **Credentials Tested:**
 - Admin: `admin@bookadoctor.com` / `admin123`
 - Doctor: `drjanesmith@bookadoctor.com` / `doctor123`
 - Patient: `johndoe@gmail.com` / `patient123`

Testing Scope

- **In-Scope:** JWT dual-token login, Doctor registration vetting console, appointment slot allocation, double-booking validation, medical locker document uploads, digital prescription generation, light/dark styling.
- **Out-of-Scope:** Stripe payment processing, real-time video consults.

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-01	Doctor Vetting Approval Flow	1. Log in as admin. 2. Navigate to "Vetting Queue". 3. Locate pending doctor and click Approve.	Doctor's profile approvalStatus shifts to "approved"; doctor displays in patient search filters.	Approved successfully; doctor appeared in search listings.	Pass
TC-02	Double-Booking Prevention	1. Log in as patient. 2. Navigate to doctor page. 3. Book slot (e.g., 12 June 2026, 10:00 AM). 4. Attempt booking another appointment with the same doctor on same slot.	Backend rejects the second booking attempt with status code 400 and a validation error.	Rejected booking attempt; validation warning shown on client.	Pass
TC-03	Medical Locker File Restrictions	1. Log in as patient. 2. Go to Medical Locker. 3. Try uploading a .exe or .zip file.	Frontend blocks request or Multer intercepts, throwing a file format error.	Upload blocked; error message displayed.	Pass
TC-04	Prescription Updates	1. Log in as doctor. 2. Open Manage Appointments. 3. Select approved	Appointment changes state to "completed"; patient dashboard shows the digital prescription.	State updated to "completed"; prescription readable by patient.	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
		booking and click "Prescribe". 4. Submit prescription text.			

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-01	EADDRINUSE: 5000 error on server startup	Run <code>npm run dev</code> when a ghost node process is active.	Medium	Closed	Resolved by checking active PIDs using <code>netstat</code> and taskkilling the ghost process.
BG-02	Seeder database authentication failure	Run seeder script with incorrect password string in <code>.env</code> .	High	Closed	Fixed by resetting user password in MongoDB Atlas and updating <code>MONGODB_URI</code> .
BG-03	node_modules folders staging to Git	Running <code>git add .</code> without a <code>.gitignore</code> file.	Low	Closed	Added a root <code>.gitignore</code> file and ran <code>git rm -r --cached .</code> to clear index.
